

**FS: Roll cage from spec 944 \$500**

Posted by KotheRacing - 04 Jan 2012 12:30

---

I have a roll cage that came out of a spec 944 racecar, I was going to build up a new spec car but decided to keep it a street car.

Cage also has window net.

\$500

Where are you located and what type of cage is it?

Thanks

I am located in Indianapolis IN. I am not sure who made the cage. It started out as a bolt in cage, then there were a couple of extra bars added to it. I have a couple of pics, not all of the cage is in the picture. There are a couple of tech inspection from the PCA on it.

It looks good. I found one locally so I'll have to pass. Good luck with the sale.

Do you have better pictures of the sides?

Thanks

I am working on them. In fact I think I am just going to sell my whole spec car project, I think I'll be making a post soon. Need to sell a couple of my projects and just focus on one.
