AIM Data System for sale
Posted by Sterling Doc - 09 Feb 2016 20:09

Putting my AIM data system up sale with lots of extras.

Smarty Cam GP (bullet cam, non-HD model)

MyChron 3 Gold Dash

Data Hub

Channel Expansion Hub

4 patch cables

RPM Harness

4 linear shock pots

Shock pots would need to be wired in. I did not use them, but did verify that they change resistance with movement.

Cost to duplicate the entire system new is over $4,000

$2,000 takes it all.

I would consider a Traqmate for a partial credit in trade.
