

Air Filter

Posted by nkgosselin - 16 Jul 2009 10:36

My car came to me with a KN filter. Is it legal to add something like dryer ducting to the front to get fresh air to it so it does not suck hot engine bay air? Could not find an answer in the rules.

As long as you plumb the exhaust directly into the intake I think we can make an allowance.

Joe, the open allowance for air intakes would seem to open the door for some creative ram-air systems. Something to be aware of & keep in mind
