

Ebay steering wheel

Posted by Gary_44 - 31 Dec 2009 06:44

looking for some education, I don't know squat about steering wheels...

I read that some folks use the Mookeeh brand for camber plates, and I found this on Ebay

So is this steering wheel and adapter junk? It has the same 6 bolt pattern as the Momo adapter, looks more solid than some of the Grant cheapo's I've seen, but is simulated leather, which is ok with me. If it's crap, what do I need to look out for and still find an affordable replacement to the factory wheel?

And what are thoughts about the flat style bottom? My leg is always hitting the bottom of the wheel when I try to heel-toe shift, thought it might help.

Thanks.

The flat bottom wheel may compromise your grip when turning.
